Implemented contact-event-conditioned world model
Measured state (30)
root 13 + history PCA 16 + road 1
Plan (11) + event ID (6)
route/speed/α/skill + distances
Known local terrain (128)
8 × 8 height + support mask
Terrain encoder
128 → 32 → 32; SiLU
Shared encoder
79 → 128 → 64; SiLU
Three output heads
64 → 62 each
Residual mean + log-variance (60)
log-time (1) + occurrence logit (1)
Physics baseline + learned residual
next state, event delay, event probability
Ground entry / airborne-contact / continuation heads
Fixed event order; no learned event-type classifier
